

Why the  
**big news**  
from us  
is **good news**  
for you

# and the big news is...

You can now enjoy a faster, more responsive service from us, to more effectively satisfy your needs. We've formed a separate division which will concentrate exclusively on providing a fast track, rapid response service for you.

## **A new name and a new approach**

This change coincides with our outright purchase of all UK operations from the Tikkurila Group in Finland. We are now entirely British owned and managed, with a brand new identity: Prospeed Coatings.

## **Prospeed Coatings. A dash of colour for industry**

The people and products you know and trust will still be available from Prospeed Coatings, but with the extra benefit of streamlined, dedicated distribution lines. As a Prospeed customer, you benefit not only from a wide choice of specialist industrial and protective coatings, but also from our rapid availability of a huge range of shades - providing a dash of colour for industry.

This improved focus becomes possible as a result of the streamlining of Protega Coatings, the division responsible for our specialist bespoke products, which focuses on the supply of tailor-made products to high volume users.

## **Responding faster to you**

At Prospeed Coatings, we'll continue to develop our business, seeking to bring you continual improvements in both products and service, to ensure we remain your first choice for all your coating requirements. For more information, please call us or visit our website.
